

### **Job Description – Technology Educator & Operational Executive**

Company: **PHN Technology Pvt. Ltd.**

Job Type: **Full-Time**

Location: **PAN India (On-site)**

Experience: **Fresher to 2 Years**

CTC Offered: **₹5.6 LPA**

### **Eligibility Criteria**

- Pass-out Years: 2020 to 2025
- Any Graduate / Postgraduate from the following streams:
  - BE / BTech, ME / MTech

### **About the Company**

PHN Technology Pvt. Ltd. is on a mission to revolutionize industries through product development, R&D, and innovation powered by cutting-edge technologies. We work with schools, colleges, and communities across India to bridge the digital divide and foster 21st-century skills such as robotics, AI, coding, and critical thinking.

We proudly collaborate with premier institutions like **IITs, NITs, IIITs**, and esteemed government bodies including **ISRO, Bharat Electronics Limited, TCIL, and ITI Limited**. Additionally, we are associated with educational regulators such as **AICTE** and **MSBTE**, reinforcing our commitment to minimizing the gap between real industry challenges and the education system.

### **Role Overview**

We are looking for passionate and self-driven individuals to join us as Technology Educators & Operational Executives. This role combines technology education, regional operational management, and innovation in domains like **Artificial Intelligence, IoT, Embedded Systems, and Drones**.

As a Technology Educator & Operational Executive, you will empower students and educators by delivering hands-on training in cutting-edge technologies while ensuring the smooth execution of our educational initiatives on the ground.

This opportunity is ideal for individuals passionate about education, innovation, and creating social impact.

### **Key Responsibilities**

- Deliver interactive training sessions on AI, Robotics, IoT, and Embedded Systems to students and teachers.
- Proactively visit and engage with schools and colleges in your assigned territory to implement training programs and ensure effective execution.
- Customize learning experiences based on the institution's needs.
- Conduct workshops to promote 21st-century skills among students.
- Oversee and manage operational activities within your region.
- Coordinate with school and college authorities, report program progress, and support lab setups.
- Innovate new ideas for training delivery and curriculum engagement.
- Identify real-life problems and actively participate in solution development.

**Note: Selected candidates will undergo comprehensive technical training by PHN Technology across all associated domains.**

**Required Skills & Qualities**

- Strong communication, presentation, and public speaking abilities.
- Leadership and decision-making skills; ability to coordinate at the regional level.
- Adaptive thinking and the ability to work independently.
- Proficiency in MS Office and Google tools (Docs, Sheets, Forms).
- Fluency in English and local language (spoken and written).
- Well-groomed, confident, dynamic, and people oriented.
